Submitted to: NSW Electoral Commission

**TEST
CERTIFICATE**

for

**PRCC LC
COUNT**

This is to certify that the Vote Count algorithm in the PRCC system for NSW Legislative Council elections in order to determine the candidates elected in accordance with the proportional representation counting method is tested using standard system testing procedures and passed against all the functionalities mentioned in the functional specification "Functional Requirements for Vote Count V3.2" document.

All the defects raised during the test execution process are fixed with no further issues. All possible scenarios were working as expected in the current version of the system **PRCC Server 1.0.5.3 & Client 1.0.5.3**.

Project execution details are available in the 'Acceptance Test Report for Votecount Algorithm' document which should be used as a further reference to this certificate.
